SESSIONAL PAPERS.

ARRANGED NUMERICALLY.

CONTENTS OF PART I.

- No. 1.. Return from the Records of the General Election to the Legislative Assembly in 1883, shewing :—(1) The number of Votes polled for each Candidate in each Electoral District in which there was a contest. (2) The majority whereby each successful Candidate was returned. (3) The total number of Votes polled in each District. (4) The number of Votes remaining unpolled. (5) The number of names on the Voters' Lists in each District. (6) The population of each District as shewn by the last Census. (7) Similar statements as to any Election holden since the General Election.
- No. 2.. Report of the Provincial Board of Health.

CONTENTS OF PART II.

- No. 3.. Memorandum of Agreement between the Governments of the Provinces of Ontario and Manitoba, in regard to the Territory in dispute between them.
- No. 4.. Report of the Inspector of Insurance.
- No. 5.. Report relating to the Registration of Births, Marriages and Deaths for the year 1882.

CONTENTS OF PART III.

- No. 6.. Analysis of the Reports of the Agricultural and Horticultural Societies of Ontario for the year 1882.
- No. 7.. Report of the Fruit Growers' Association of Ontario for the year 1883.
- No. 8.. Report upon the Common Gaols, Prisons and Reformatories of the Province for the year ending 30th September, 1883.

CONTENTS OF PART IV.

- No. 9.. Report of the Entomological Society of Ontario for the year 1883.
- No. 10.. Report of the Librarian on the State of the Legislative Library.
- No. 11.. Report of the Council of the Agricultural and Arts' Association of Ontario for the year 1883.
- No. 12.. Report of the Commissioner of Public Works for 1883.
- No. 13.. Report of the Ontario Agricultural College and Experimental Farm for 1883.

CONTENTS OF PART V.

- No. 14. . . Report of the Minister of Education for the year 1883.
- No. 15. . . Public Accounts of the Province for the year 1883.

CONTENTS OF PART VI.

- No. 16. . . Report upon the Hospitals of the Province for the year ending 30th September, 1883.
- No. 17. . . Return of copies of all correspondence between the Government, or any member thereof, or the Superintendent or Inspector of Insurance, and the Union Fire Insurance Company of Toronto, or any of its officers, relating to the business of the said Company, and all Orders in Council or Inspectors' Reports relating to said Company which have been passed or made since the first day of January, 1880. (*Not printed.*)
- No. 18. . . Return shewing the number of Local Boards of Health organized last year ; the number of Local Boards reported to the Provincial Board of Health ; the existence of contagious diseases ; what these diseases are, and the number of municipalities in which the officers of the Provincial Board exercised their power.
- No. 19. . . Report upon the Ontario Institution for the Education and Instruction of the Blind, Brantford, for the year ending 30th September, 1883.
- No. 20. . . Return shewing the number of appeals to the County Judge, or acting Judge, of the County of Kent from the Court of Revision of each of the municipalities of the said County, in reference to assessment upon the lands of individuals for drainage, under the Municipal Act of Ontario, said Return to state in each case the name of the Judge who tried the case ; the names of the appellants and respondents ; the decision of the Judge ; the amount of costs, and in what case or cases, if any, said Judge inspected the premises in question pursuant to sub-section 4 of sec. 12 of chap. 199, R. S. O., said Return to be from the time the said Act came into force to the present time. (*Not printed.*)
- No. 21. . . Return shewing the number of Lunatics committed to the Gaols in each county of the Province during the years 1880, 1881, and 1882 ; the length of time they remained in the gaols and how disposed of ; also, in the case of those removed to the Provincial Asylums, the cost of such removal. (*Not printed.*)
- No. 22. . . Return shewing the number of members of each County Council in the Province, the number of such members representing Towns, Villages or Townships respectively, and the assessments of each such Town, Village or Township. (*Not printed.*)
- No. 23. . . Return shewing the number of Reeves and Deputy Reeves respectively composing the various County Councils of the Province in the years 1872, 1877 and 1881, respectively, together with a statement of the amount paid as indemnity to members in each of the above mentioned years.

- No. 24.. Return shewing the number of Petitions that have been received by the Government during the years 1880, 1881 and 1882 from Municipal Councils, asking that the power of granting licenses may again be placed in their hands, and also for a relaxation of the Saturday night restrictions. (*Not printed.*)
- No. 25.. Return of copies of correspondence and documents between the Provincial Secretary and the License Commissioners or License Inspector of East Huron in reference to the granting of a Hotel License to one Conover in the Village of Blue Vale. (*Not printed.*)
- No. 26.. Report of the Queen's Printer on Tenders for Departmental and Legislative Printing and Binding, and contract with Squire Frank Wilson.
- No. 27.. Report upon the Ontario Institution for the Education and Instruction of the Deaf and Dumb, Belleville, for the year ending 30th September, 1883.
- No. 28.. Report of the School of Practical Science for the year 1882-3.
- No. 29.. Report of the Council of University College for the year 1882-3. (*Not printed.*)
- No. 30.. Estimates for the year 1884.
- No. 31.. Report on the working of the Tavern and Shop Licenses Act for the year 1883.
- No. 32.. Report upon the Houses of Refuge and Orphan and Magdalen Asylums aided by the Province, for the year ending 30th September, 1883.
- No. 33.. Report of the Inspector of the House of Industry of the County of Elgin. (*Not printed.*)
- No. 34.. Report of the Commissioner of Crown Lands for the year 1883.
- No. 35.. Return shewing the number of Teachers in each High School and Collegiate Institution in the Province, for the years 1881, 1882 and 1883; the salary paid to each teacher, and the Government grant to each School and Institute. (*Not printed.*)
- No. 36.. Return from the Queen's Printer as to the disposal of the Statutes for the year 1883. (*Not printed.*)
- No. 37.. Order in Council with reference to drains, numbers one, two and three of the Township of Dunwich. (*Not printed.*)
- No. 38.. Orders in Council commuting the fees of Judge Daniel, of L'Orignal, and Judge Jones, of Brantford, payable under the Surrogate Courts Act. (*Not printed.*)

CONTENTS OF PART VII.

- No. 39.. Return of all Acts passed by the Legislature of Ontario and disallowed by the Government of the Dominion of Canada since 1st July, 1867, with the reasons assigned for such disallowance, set forth in full, together with the names of the Ministers of Justice upon whose recommendation such Acts were disallowed, and the dates of the Orders in Council disallowing the same.

- No. 40. Return of all Official Correspondence with regard to Cap. 13 of 42 Victoria, respecting Grand Juries, as to submitting the question to the Supreme Court.
- No. 41. An agreement made between John R. Barber, of Georgetown, of the one part, and Her Majesty the Queen, of the other part, for the supply of Printing Paper.
- No. 42. Statement of all the Fees and Emoluments received by the Registrars of Ontario for the year 1883, made in accordance with the provisions of the R. S. O., Cap. III. Sec. 97, and 43 Vic., Cap. 3, Sec. 2, with which are contrasted receipts of same nature in 1881 and 1882.
- No. 43. Return of copies of all correspondence between the Government of Ontario, or any member thereof, and the Government of Canada, or the Government of Quebec, or any members thereof, respectively, subsequent to that already brought down, relative to a settlement of the outstanding accounts between the said Governments, or of the Land Improvement Fund.
- No. 44. Return shewing the Municipalities in which public markets were in existence at the time of the passing of the Act respecting Market Fees; the municipalities which have abolished market fees *in toto*; the municipalities which have availed themselves of the right to impose fees on vendors voluntarily using the market place under Section 8 of the Act and subsections; the municipalities which, under by-law, charge market fees on all articles except those exempt from fees, under Section 1 of the Act. (*Not printed.*)
- No. 45. Return shewing the municipalities that have passed by-laws limiting the number of Tavern Licenses since January, 1876; the municipalities that have passed by-laws restricting the number of Shop Licenses since January, 1876; the municipalities that have passed by-laws restricting Shop License holders, so as to confine the business of such shops solely and exclusively to the keeping and selling of liquor, or which have imposed restrictions other than that imposed by Statute on such, since January, 1876.
- No. 46. Return showing the amount expended by the several municipalities in the years 1871, 1872, 1880, 1881, and 1882, designating, as far as possible, the different services for which such expenditure was made, and also the amounts received by the municipalities in the same years, and for the years 1874 and 1875, from liquor licenses, and also from fines for breach of license laws or liquor license by-laws for the same years. (*Not printed.*)
- No. 47. Report upon the Asylums for the Insane and the Asylums for Idiots of the Province, for the year ending 30th September, 1883. (*Incorporated with No. 8.*)
- No. 48. Return of all correspondence between the Surgeon of the Central Prison and any Member or Officer of the Government, in reference to meat supplied to that institution.

- No. 49.. Return of : 1. Copies of the Writ of Election for the holding of the last Election for the Electoral District of Algoma. 2. All instructions to the Returning Officers. 3. All Correspondence between the Returning Officer and any Member or Officer of the Government. 4. All Orders in Council fixing the places for opening and holding Polls at the said Election. 5. All Petitions or applications to His Honour with reference to the fixing of such places or the changing of the places so fixed. 6. All Communications between any Member or Officer of the Government and any other person, with reference to the fixing or changing of such places. 7. All requisitions or applications made to the Returning Officer with reference to the fixing of such places or adding to the number of them. And for a statement shewing the Polling Places fixed by Statute, and at which such places Polls were not opened and held. And for a copy of the Return made by the Returning Officer.
- No. 50.. Return of all correspondence, reports and papers connected with the dismissal of John McEwen, Esquire, from the office of Sheriff of the County of Essex, and of the appointment, in his place and stead, of John C. Her. (*Not printed.*)
- No. 51.. Return of copies of the Annual Reports of the Muskoka Slide, Dam and Boom Company for the years 1882 and 1883. (*Not printed.*)
- No. 52.. Correspondence between the Government of the Province of Ontario and the Government of the Dominion of Canada, with reference to the case of the Queen *vs.* Hodge, and the Dominion Liquor License Law.
- No. 53.. Statement shewing what timber cut in the disputed territory, outside the railway belt, has been seized by or under the instructions of the Government, and the names of the persons, firms or companies in whose possession the timber seized was at the time of its seizure; the approximate quantity affected by each seizure, and whether such seizures (if any) are still maintained, and, if so, in what way. 2. A statement shewing in detail the receipts since 1st June, 1883, for the dues in respect of timber cut in the disputed territory, and the person by whom the dues were paid. 3. Copies of all instructions given to Mr. Aubrey White in respect of such timber, and of all correspondence between him and any Member or Officers of the Government between the 1st of June, 1883, and the 1st day of January, 1884.
- No. 54.. Return shewing in detail all sums claimed by or allowed to Returning Officers, Deputy-Returning Officers or other persons, for services and expenses in connection with the last Election in the District of Algoma. (*Not printed.*)
- No. 55.. Report of the Bureau of Industries for the year 1883.
- No. 56.. Copies of the Commissions issued to George R. Pattullo and George Burden, the Commissioners appointed in connection with the disputed territory. 2. Copies of the instructions issued to Commissioners. 3. Copies of all communications which have passed between the said George R. Pattullo and George Burden, or either of them, and any member or officer of the Government, from the date of the appointment to the 1st day of January, 1884. 4. Copies of all Orders in Council passed with reference to the appointment of Commissioners or their duties, or otherwise in relation to their transactions.

- No. 57. . . . Return of copies of all correspondence with the Government, or any member thereof, relating to the project of establishing an International, Dominion or Provincial Park at Niagara Falls. (*Not printed.*)
- No. 58. . . . Report of the University of Toronto for 1882-3. (*Not printed.*)
- No. 59. . . . Return shewing the total amount expended for repairs of the Parliamentary and Departmental Buildings, and for rents and repairs of temporary offices, since the 1st day of January, 1880.
- No. 60. . . . Return of copies of all correspondence, petitions or memorials, respecting the appointment of Stipendiary Magistrates and Division Court Judge for the Provisional County of Haliburton; also, copies of all correspondence, petitions, resolutions, memorials, or other papers forwarded to the Government, or any member thereof, relating to the said appointment, either prior to or since said appointment was made, with dates of each communication respectively. (*Not printed.*)
- No. 61. . . . First Report of the Inspector of Legal Offices for the year 1883.
- No. 62. . . . Statements and Returns of the Toronto General Trusts Company for the years 1882 and 1883. (*Not printed.*)
- No. 63. . . . Return of copies of all correspondence and memorials respecting the appointments of Police Magistrates in the Villages of Merrickville and Cardinal. Copies of all correspondence between the head of the municipality of the Town of Prescott, or any member of the Council thereof, or of any other person, with the Honourable The Attorney-General, or any member of the Government, relating in anywise to the appointment of a police magistrate for the said Town of Prescott; and of all petitions, resolutions, memorials or other papers forwarded to the Government or any member thereof, relating to the said appointment, either prior to or since said appointment was made, with dates of each communication respectively. (*Not printed.*)
- No. 64. . . . Return of copies of all correspondence between the Government, or any member thereof, and the representatives of the various municipalities bordering on Lakes Simcoe and Couchiching, or any other person or persons, together with all reports and papers (not already brought down) on the subject of removing the obstructions from the Severn River, near the outlet of Lake Couchiching, whereby the waters of Lakes Simcoe and Couchiching would be lowered and a large quantity of land reclaimed. (*Not printed.*)
- No. 65. . . . The Bursar's Statement of cash transactions of Upper Canada College, for the year ended 30th June, 1883. (*Not printed.*)
- No. 66. . . . The Bursar's statement of cash transactions of the Toronto University and University College, for the year ended 30th June, 1883.
- No. 67. . . . Statement of the amount of Fees and Emoluments earned, and disbursements made by County Crown Attorneys of the Province of Ontario, for the year ending 31st December, 1883, in accordance with the provisions of 43 Victoria, Cap. 3, Sec. 2, Statutes of Ontario.
- No. 68. . . . Statement of the amount of Fees and Emoluments earned, and disbursements made, by Clerks of the Peace of the Province of Ontario, for the year ending 31st December, 1883, in accordance with the provisions of 43 Victoria, Cap. 3, Sec. 2, Statutes of Ontario.

- No. 69.. Return shewing the population of the Village of Gravenhurst according to the last Dominion Census; also, the number of Tavern Licenses granted in the said village during the license years 1881-2, 1882-3 and 1883-4. (*Not printed.*)
- No. 70.. Return of all correspondence and papers in connection with the refusal of a license to Mr. Bradley of the Lambert Hotel, Port Hope. (*Not printed.*)
- No. 71.. Return shewing:—1. The specifications for the Gaol at Rat Portage. 2. Estimates of the cost of its construction. 3. The tenders, if any, received for the work to be done or any part of it. 4. All reports upon the tenders received. 5. A statement shewing what part, if any, of the work was done under contract. 6. A statement shewing, under proper heads, the expenditure incurred in erecting said Gaol, with the names of the persons paid. 7. A statement shewing the amount, if any, yet unpaid on account of the cost of constructing said Gaol.
- No. 72.. Copies of all correspondence between the Governments of Ontario and Quebec, or any member or officer thereof, relating to, or containing the agreement come to between the said Governments, whereby the boundary between the Provinces of Upper and Lower Canada, now respectively named the Provinces of Ontario and Quebec, north of Lake Temiscamingue, which have never been authoritatively determined, was agreed to be determined in the manner enacted and set forth in the Act, Chapter three, of the Consolidated Statutes of Ontario, but subject also to ratification by the Legislature of the said Province of Quebec, and by the Parliament of Canada. And also copies of all correspondence between the Government of the Province of Ontario, or any member or officer thereof, and the Government of the Dominion, or any member or officer thereof, with regard to the said boundary, and with regard to the ratification thereof by the Parliament of Canada.
- No. 73.. Return of a Statement of the Receipts and Expenditures of the Province, between the 1st January and 15th February, 1884. (*Not printed.*)
- No. 74.. Statement of Fees and Emoluments earned and disbursements made by Sheriffs of the Province of Ontario for the year ending 31st December, 1883, in accordance with the provisions of 43 Victoria, cap. 3, sec. 2, Statutes of Ontario.
- No. 75.. A statement shewing in detail all moneys expended in, or in connection with, the disputed territory or its government, since the 1st of June last, shewing the persons to whom such moneys were paid, and the purposes for which the same were expended. 2. A like statement as to the pecuniary liabilities incurred for the like purposes, and which have not yet been discharged. 3. A statement shewing in detail the number of Constables and Peace Officers employed by or on behalf of the Province since 1st June last, in the disputed territory, such statement to contain a record of the number employed each day, and to shew the amount of the daily expenditure for such service. 4. A statement shewing in detail the sums of money remitted to any person since 1st June, 1883, to be expended in the disputed territory, and the persons to whom, and the purpose for which, the same were sent. 5. Copies of all instructions given with regard to the conduct or management of the Police Force and their duties.

- No. 76.. Abstract of Returns of Receipts, Expenditures, Assets and Liabilities for the year 1882, of the Municipalities of the Province, made by clerks of Municipalities pursuant to 43 Victoria, cap. 24, sec. 6, with the population of each Municipality.
- No. 77.. Copy of the judgments of the Judicial Committee of the Privy Council, delivered in the cases of *Russell vs. The Queen*, and *Hodge vs. The Queen*.
- No. 78.. Return shewing the amount paid to each railway out of the funds of this Province up to December 31st, 1883; also, the number and total amount of unpaid certificates that each of the aforesaid railways are entitled to. And, also, the railways which are entitled to aid under any of the enactments of the Province, but, to which no money has, as yet, been paid; such Return to shew the total amount they are entitled to, either by a direct payment or by certificate; also, to shew the total amount payable in each year.

CONTENTS OF PART VIII.

- No. 79.. Report of the Inspector of Division Courts for the year 1882.
- No. 80.. Return shewing the assessed value of property in each school section for the year 1883. The amount raised in each section for ordinary school purposes, with the rate on the dollar for the same year. The amount received by each section from the Government Grant for the same year. The length of time in said year the schools in each section were kept open. The class of certificate held by the teacher in each section, and, so far as practicable, the area of acres in each section, or generally, about the number of acres in each section. (*Not printed.*)
- No. 81.. Copies of all correspondence between the Government of Ontario, or any member thereof, and the Government of the Dominion, or any officer thereof, respecting any claim for arrears or annuities due to the Indians, or the Dominion on behalf of the Indians, under Treaties for the relinquishing of Territorial rights on the shores of Lakes Huron and Superior, known as the "Robinson Treaties."
- No. 82.. Return of copies of all correspondence and communications between the junior Judge of the County of Ontario, or any other person, and the Attorney-General, or any member or officer of the Government, with regard to the conduct of one J. P. Foley, Esquire, of Mara, one of the Justices of the Peace for the said County. (*Not printed.*)
- No. 83.. Report of the Department of Immigration for the year 1883.
- No. 84.. Return of copies of all Orders in Council, or departmental regulations, with regard to the powers or duties of the Public School Inspectors as to changes in the text books in use in the schools within their Inspection Districts, and of all circulars issued by the Department of Education with reference to such powers, or duties, or the authority under which such changes should be made.
- No. 85.. Return shewing the value, on the 1st day of January, 1884, of the then outstanding Scrip issued in aid of railways, calculating the payments to be made as capitalized at five *per cent*.

- No. 86.. Return giving a statement of the aggregate amount of forty year Scrip which it will be necessary to issue in order to take up the Railway Scrip now outstanding, as the same matures. Also, a statement of the sum which the annual saving effected by the substitution of the new Scrip for the old, each year would amount to at the end of forty years, if funded at five *per cent.*, the rate now received on special deposits.
- No. 87.. Return of all correspondence, lease and papers connected with the leasing of a part of Rondeau Point to the Messieurs Weldon. (*Not printed.*)
- No. 88.. Return of copies of all correspondence and communications with or by the Attorney-General, or any member or officer of the Government, and any other person, and all reports and Orders in Council with reference to the removal from the office of Police Magistrate of Port Perry, of John Nott, Esquire. (*Not printed.*)
- No. 89.. Return of copies of all general rules and orders made by the judges since the passing of the Ontario Judicature Act, and all general rules and orders made by the Court of Appeal.
- No. 90.. Return of all correspondence between the Executive of the Lambton Prohibitory Association and the Provincial Secretary, or any other member of the Government, with regard to the appointment of a License Officer at Petrolea. Also, copies of all communications and correspondence between the Government, or any member thereof, and any other persons, with reference to such appointment. Also, copies of all correspondence between the License Commissioners for West Lambton and any other person, or body, with regard to such appointment. Also, copies of any recommendations made to the Executive Council, with reference to such appointment, and of all Orders in Council relating thereto. (*Not printed.*)
- No. 91.. Return of a copy of the circular issued from the Attorney-General's Department, bearing date on the 14th day of January, 1882, with respect to the efficiency or otherwise of the present system of detecting crime and bringing the offenders to justice, with the answers to the circular, and any other correspondence on the subject.
- No. 92.. Return shewing the names and residences of the members now comprising the Central Committee of Examiners. The dates of their several appointments. Copies of all Orders in Council or Departmental Regulations defining the powers and duties of the Committee. Copies of the minutes of the proceedings of the Committee, except those relating to examinations since first day of January, 1882. Copies of all recommendations made by the Committee to the Minister of Education, or the Government, upon any matter upon which they have made recommendation. (*Not printed.*)
- No. 93.. Return of copies of all Orders in Council, Departmental Regulations or instructions, with regard to the use of Text Books in the Normal and Model Schools since 1867.
- No. 94.. Amount in detail, of sums received from the Mercer Estate during the years 1882 and 1883.
- No. 95.. Return shewing, from the institution of the office, the dates at which the Reports of the Inspector of Insurance Companies have been laid upon the Table of the House, and the year for which such statement was prepared. And that a corresponding statement be submitted, giving like dates and years, with regard to the similar Reports respecting Insurance Companies made to the Parliament of the Dominion, by their like officer.

- No. 96... Return of copies of all Petitions from Municipal Corporations, praying for the investigation of the Financial Standing of said Corporations, and also, all correspondence between the Government and said Corporations, in regard thereto. (*Not printed.*)
- No. 97... Return of copies of all communications between the Senate of the University of Toronto and the Government, on the subject of further State Aid to the University.
- No. 98... Copy of certain Resolutions passed as to a meeting of the graduates and other friends of Queen's University, Kingston, resident in that city, and held on the fourth day of March instant. (*Not printed.*)
- No. 99... Return giving :—1. The names of the officers and directors of the Muskoka Slide Dam and Boom Company, and a copy of the Charter of the said Company. 2. Copies of all correspondence (if any) with reference to the transfer to the said Company of the whole, or any part of the Muskoka River works, or the fixing of the tolls to be taken by the said Company. 3. Copies of the tariff of tolls adopted by the said Company, or approved of by the Lieutenant-Governor in Council. 4. A statement of the amounts expended in each year since Confederation on such part of said works. (*Not printed.*)
- No. 100... Return shewing in each and every year since 1871, inclusive, the amount of money paid by the teachers of Ontario into the Superannuated Teachers' Fund; the amount paid out by the Government to superannuated teachers; the amount in each year paid out in excess of the amount paid into said fund; the total amount paid out of said fund; and the amount of the latter over the former. And the amount paid out to teachers who have withdrawn from the fund during the same period.
- No. 101... Return shewing the names of the persons to whom, the prices for which, and the dates when the water fronts or lots, at or near Prince Arthur's Landing, were sold or disposed of. Also, a Return shewing in which of the grants any of the said water lots or fronts a reservation is made of a right of way for the Canadian Pacific Railway. And also, a map or sketch, shewing the position of each of the said water fronts or lots sold or disposed of, specially with reference to the streets of Prince Arthur's Landing. (*Not printed.*)
- No. 102... Return shewing in detail the municipalities which have borrowed from the Province under the provisions of the Tile Drainage Act and Municipal Drainage Act; the date of the loans; the amounts borrowed; the terms of payments of the debentures purchased by the Province; the amounts paid on account thereof for principal and interest, shewn separately; the amounts remaining unpaid for principal and interest, shewn separately.
- No. 103... Statement shewing the amount of money on deposit in the Banks, or other moneyed institutions, to the credit of the Province on the first days of January, February and March, 1884, respectively, whether in the Province or elsewhere, giving the name of each Bank or other institution wherein these moneys are deposited, and the amount in each, respectively. Also, the amount at interest in each Bank or other institution, and the rate of interest allowed in each case on said deposits; and the amount available on call without interest in each Bank or elsewhere, with their names in each case.

- No. 104. Return shewing the respective amounts paid by such Municipalities in the Province of Ontario in which the Dunkin or other Temperance Acts are in force, towards the License Fund of the District in which they are situated.
- No. 105. Return shewing :—1. The several lots in the Townships of Tudor, Wollaston, Limerick and Faraday, in the County of Hastings, which have been sold, located, disposed of or applied for since January 1st, 1880. 2nd. The dates of said sales ; the persons to whom sold ; the prices paid and terms of payments. 3rd. The dates of the several applications for the purchase or location of said lots.
- No. 106. Report of the Secretary and Registrar for the year 1883.
- No. 107. Return of copies of all instructions given to, and reports and correspondence from, the "Consulting Board" or other persons, with reference to the erection of three Public Creameries provided for in the Estimates for 1883, and a statement of all moneys paid to or still due any member of such Board, or other person, for his services in connection therewith.
- No. 108. Return shewing the names of all prisoners in the Central Prison, who, during the year 1883, were punished for infraction of the Prison Rules, giving the date and nature of such punishment. A copy of the Surgeon's Certificate or Report, in reference to prisoners who were punished during the year 1883 in the Central Prison. The names of all prisoners who were sent from the Central Prison to the Asylum for the Insane during the year 1883. (*Not printed.*)
- No. 109. Return shewing what lands in the District of Algoma (including the Disputed Territory), have been sold or disposed of since the first day of January, 1882 ; with the names of the persons to whom such lands were sold, and the price *per* acre paid or agreed to be paid therefor, and how much of it still remains unpaid, and, so far as practicable, the names of persons by whom such lands are now owned or held. (*Not printed.*)
- No. 110. Return of copies of all Orders in Council passed under the authority of the General Mining Act creating, extending, adding to, or diminishing mining divisions. (*Not printed.*)
- No. 111. A Statement shewing in detail all claims brought before the Commissioners appointed in the Disputed Territory (Messrs. Pattullo and Burden), or either of them ; the dates when they were made, and the disposal made of them by the Commissioners, and when such disposal was made. 2. A statement in detail of all expenditures for salaries and otherwise in connection with the Commission issued to them. (*Not printed.*)

MEMORANDUM OF AGREEMENT

Between the Governments of the Provinces of Ontario and Manitoba,
in regard to the Territory in dispute between them.

Presented to the Legislative Assembly, by Command.

ARTHUR S. HARDY,
Secretary.

PROVINCIAL SECRETARY'S OFFICE,
TORONTO, 28th January, 1884.

MEMORANDUM OF AGREEMENT

BETWEEN THE GOVERNMENTS OF THE PROVINCES OF ONTARIO AND
MANITOBA, IN REGARD TO THE TERRITORY IN DISPUTE
BETWEEN THEM.

In order to have the question of the title to the Disputed Territory set at rest at the earliest possible day as between the Provinces, so far as the same is possible by the action of the said Provinces ;

And in order to avoid unnecessary conflicts or collisions in the meantime between the Courts or officers of the two Governments, and to make the best practicable arrangement on which the two Governments can now unite as to matters within Provincial jurisdiction, for the administration of justice and the preservation of peace and order, the said Governments of Ontario and Manitoba agree as follows :—

1. Neither Government is to be understood by this Agreement as abandoning any claim such Government has heretofore made, or had, to, or in, the Disputed Territory, or any part thereof.

2. Neither Government is to be required to withdraw its courts and officers from those parts of the territory in which they have hitherto assumed to exercise jurisdiction ; but the future exercise of such assumed jurisdiction is to be subject to the provisions hereinafter contained.

3. The provisions of this Agreement are to be carried into effect by the necessary legislation in each of the two Provinces of Ontario and Manitoba as early as possible in the next session of its Legislature, and are to be binding meanwhile on the two Governments.

4. In the territory South and East of the Height of Land which divides the waters which flow into the Great Lakes from those which flow into Hudson Bay, the laws of Ontario only shall be in force ; and its Courts, Officers, Government and Legislature shall have the jurisdiction therein, pending the dispute, which they have heretofore assumed or exercised, and which they would respectively possess in the said last-mentioned territory if the same were an undisputed part of the Province of Ontario.

5. All proceedings, suits and actions in respect of past assaults on, or arrests, or imprisonments of the officers or the licensees of either Government, or in any manner growing out of such assaults, arrests or imprisonments, and all other suits and actions in respect of past acts, where the liability depends on whether the locality in which the same took place is in Ontario or Manitoba, are hereby suspended until the decision of the Privy Council.

6. The following clauses, numbered from 7 to 29, refer to the Disputed Territory lying North and West of the Height of Land aforesaid.

7. The Lieutenant-Governor in Council for the Province of Ontario and the Lieutenant-Governor in Council for the Province of Manitoba may each appoint from time to time a Commissioner of Police for all the territory within the Municipality, or intended Municipality, of Rat Portage, whether intended to be incorporated under Statutes of Ontario or of Manitoba, and for the territory along the line of the Canada Pacific Railway in the Disputed Territory, and extending for a quarter of a mile on each side of the said railway. The said territory may be hereafter known as "The Canada Pacific Magisterial District." Each Commissioner of Police shall hold office during the pleasure of the Lieutenant-Governor in Council, by whom he may be appointed.

8. The said Commissioners shall be, *ex officio*, Police Magistrates in and for the said territory, North and West of the Height of Land, and shall each possess within it every jurisdiction and authority possessed by a Police Magistrate, under the laws of either of the said Provinces.

9. The said Commissioners shall hold Court together whenever this is practicable, and when so sitting, or when sitting apart, shall have co-ordinate authority, and no Justice of the Peace, Stipendiary Magistrate, or Commissioner of Police, appointed by the Lieutenant-Governor of either of the said Provinces, except the said Commissioners appointed under this agreement, shall hereafter exercise any jurisdiction or authority in criminal matters within Rat Portage.

10. The said Commissioners shall appoint as a Police Force such constables as they may from time to time think necessary. Special constables may be appointed and sworn in, in cases where the law provides for such. Every constable so appointed shall have authority in every part of the Disputed Territory, North and West of the Height of Land. The Commissioners shall jointly have charge and control of the said Police Force, and of all Special and other Constables. The Lieutenant-Governor of either Province may from time to time appoint additional and other Constables at the expense of the Government appointing them,

11. The salary of each Commissioner shall be borne by the Province appointing him, and each of the Provinces shall pay one half of the expense of the Police Force employed jointly by the Commissioners.

12. The licenses heretofore granted for Rat Portage or its neighbourhood, by or under the authority of either Government, for taverns, shops, or public billiard tables, are confirmed for the remainder of the year for which they have respectively been granted.

13. The said two Police Commissioners shall have the sole authority to grant new licenses for any of the said purposes, in the said territory, North and West of the Height of Land, but so that the whole number of tavern licenses in force in Rat Portage at one time shall not exceed twelve.

14. The Statutes in force in each Province in respect of the sale of fermented or spirituous liquors, and the regulation of licensed taverns and shops, and the penalties for the contravention of such Statutes shall, unless where otherwise provided by the present agreement, apply to the same disputed territory, North and West of the Height of Land, as if the same were an undisputed part of such Province, and the said licenses had been issued under "The Liquor License Act of Ontario," and under the laws of Manitoba respectively. If the laws of the said two Provinces conflict, the Commissioners shall have power to make regulations in respect of such matters, so as to remove the conflict. The issuing of licenses shall be subject to any valid paramount law in force from time to time.

15. The said Commissioners shall have the powers possessed by a Board of License Commissioners under the said License Act of Ontario, and the powers possessed by a Municipal Council under the laws of Manitoba (subject to any paramount law), and shall in respect of the licensing, regulating and governing all persons who, for hire or gain, keep

or have in their possession, or on their premises, a billiard table or tables, the powers which are possessed by a Council of a Town in Ontario or Manitoba. Such powers may be exercised by resolution.

16. The fees to be charged for the said licenses respectively shall be fixed by the said Commissioners; but the fee for a tavern license shall not be less than one hundred and fifty dollars, and the fee for a shop license not be less than fifty dollars. No more than twelve tavern licenses shall be issued for Rat Portage. These sums are to cover all fees which may be payable by anyone obtaining a license under any Provincial law, or any Dominion law, if any such should be in force.

17. The said Commissioners shall appoint an Inspector of Licenses, who shall possess all the powers which are possessed by an Inspector of Licenses under the laws of either of the said Provinces. If the Commissioners cannot agree on the Inspector, each Lieutenant-Governor in Council may appoint an Inspector to hold office with the said powers, until the Commissioners agree on one Inspector; and to be paid by the authority appointing him.

18. The fees collected for said licenses in Rat Portage, and all fines levied in Rat Portage for offences against Provincial or Municipal laws, and all other fines under Provincial authority levied for offences committed in Rat Portage shall be deposited in some branch office of the Bank of Ontario at least once a week to the credit of the Provincial Commissioners, and shall be applied by joint cheques signed by the two Commissioners, in the first place, to pay those expenses of the Board which are not hereinbefore provided for, and the balance on the first day of every month be paid over by joint cheque as aforesaid, to the Municipal Board hereinafter provided for, to be applied by the said Board to the purposes of the Municipality.

19. All fees collected for licenses for taverns, shops or billiard tables, outside of Rat Portage, and all fines levied for offences against Provincial or Municipal laws committed outside of Rat Portage, and all other fines under Provincial authority committed outside of Rat Portage, North and West of the Height of Land, shall be paid into the said bank to the joint credit of the Treasurers of Manitoba and Ontario, to be held in trust until the dispute as to the Territory is decided.

20. The Commissioners shall render to each Government a quarterly account of their receipts and payments, with such other information as either Government may call for.

21. The authority of the Councils of Rat Portage, incorporated or claiming to be incorporated under respectively the statutes of Ontario and Manitoba, and the by-laws thereof respectively, are to be suspended, and the municipal affairs of the said town shall be administered by a Municipal Board to be composed of five members, who shall be elected on the fourth Tuesday after the respective Legislatures of the said Provinces shall have passed Acts confirming this Agreement, and shall hold office until the said territorial dispute is determined by Her Majesty in Council, or until otherwise agreed by the said Governments: provided, that in case of a vacancy by death or resignation, or by a member of the said board ceasing to reside in Rat Portage, the remaining members shall have the like authority for taking all necessary proceedings for the holding of an election to fill such vacancy, as is possessed by a Town Council in Ontario or Manitoba. Alexander Matheson, Hudson Bay Factor, is to be Returning Officer at the first election. Provision is to be made by concurrent legislation for the appointment of an Umpire in case the Commissioners differ in regard to any matters referred to in this case. The Board shall be a corporation under the name of "The Municipal Board of Rat Portage," and shall possess every power and authority possessed by Municipal Councils of Towns in either of the said Provinces.

22. Every male person who is a British subject of the age of twenty-one years, and who is at the time of the election, and for not less than six months has been a resident free-

holder or resident householder in the Municipality, shall be entitled to vote at the election, and such election is to be held on the fourth Tuesday after the respective Legislatures of the Provinces have passed an Act confirming this Agreement. The two Provinces are to pass such other concurrent legislation as may be necessary or proper for determining other matters relating to the conduct of the election, and the mode of trying any controverted election, to the said Board.

23. For the purposes of the next two preceding sections, Rat Portage shall include all the territory which was included within the incorporation, or supposed incorporation, of Rat Portage, either under the Statutes of Ontario or Manitoba.

24. Probates of Wills and Letters of Administration hereafter granted by a Surrogate Court of either Province, in the case of persons domiciled or dying in the Disputed Territory, North or West of the Height of Land, are to be as valid as if issued by the Surrogate Courts of both Provinces.

25. With respect to suits and actions hereafter brought, or with respect to matters which may hereafter take place, respectively, and with respect to all offences which the Provinces have jurisdiction to deal with in this behalf, the Courts, Judges, Magistrates and other officers of each Province shall have the same jurisdiction in the Disputed Territory, North and West of the Height of Land, as if the Territory were in such Province.

26. With respect to all matters not provided for by the next preceding clauses, the Courts, Judges, Magistrates, Sheriffs and other officers of each Province shall not, on any ground whatever, interfere with the Courts, Judges, Magistrates, Sheriffs and other officers of the other Province, pending the dispute. But this clause is not to prevent any individual from setting up the question of jurisdiction in, or in respect of, any matter not covered by the next preceding two clauses.

27. Except by the consent of the two Governments, no Courts are to be held at any places in the territory, North and West of the Height of Land, in which Courts of that Province have not hitherto been held.

28. All Magistrates who now hold commissions from the Lieutenant-Governor of either Province, which would give them jurisdiction in the said territory, North and West of the Height of Land, if the same were part of that Province, shall have jurisdiction in the said territory as if they held commissions from the other Province as well as from their own Province.

29. No Magistrate hereafter appointed by the Lieutenant-Governor of either Province shall have jurisdiction in the said territory, North and West of the Height of Land, until he receives a commission from the Lieutenant-Governor of the other Province.

30. The joint case hereto annexed is hereby mutually agreed to by the said Governments, provisionally, and subject to the following understanding, viz. :—

If Mr. Christopher Robinson, Counsel for Manitoba, or Mr. Mowat, on behalf of Ontario, should hereafter be of opinion that there ought to be some variation of the said case, as to the forms of the questions submitted or otherwise, and notifies, in writing, such opinion to the other on behalf of Ontario or Manitoba, as the case may be, on or before the fifteenth of February next, the said case is to be varied in any way that they may agree; or if they differ, the said variation may be decided in manner hereinafter provided, with respect to documentary evidence as to which the parties may differ; but no variation is to be made after the fifteenth April next.

31. Either Government may apply *ex parte* to Her Majesty or to the Judicial Committee to have the said case set down for argument in the month of June or July, 1884. If the said Joint Case is not set down to be argued in June or July next, or is not argued

then, either party may apply at any time *ex parte* to have the said case set down or argued at such other time as the Judicial Committee aforesaid may appoint.

32. For the purpose of considering the true boundary the following evidence is to be submitted to the Privy Council, *quantum valeat* :—

(1) The book of Arbitration documents ; the cases submitted to the Arbitrators on behalf of the Dominion of Canada and the Province of Ontario, respectively, and all maps referred to in the said book or said cases.

(2) The Acts of the Legislature of Ontario on the subject of the boundaries.

(3) All other documents which were produced before the Select Committee of the House of Commons, or which have come into the possession of either Government.

(4) The notes of Chief Justice Sewell on the trial of the De Rheinard case, on their authenticity being established to the satisfaction of the Judges or Judge hereinafter referred to, or of the Attorney-General of Ontario.

(5) In case of any question arising with respect to any documentary evidence as to whether it should be included in the joint case, the question is to be referred at the instance of either party to the Chief Judges of the Appeal Courts at Toronto, viz. : the Honourable Messieurs Spragge, Hagarty, Wilson and Boyd, or a majority of them, or the Attorneys-General of the two Provinces, or their agents in their behalf, are to have power to jointly refer any such questions to one or two of the said Chief Judges, or to the Chief Justice of the Supreme Court of Canada. The decision in any of such cases, if certified by the Judges or Judge before the 15th April next, shall be final as regards the submission of such evidence to the Privy Council *quantum valeat* ; and the evidence, with the certificate of the Judges or Judge, shall be forthwith printed. No evidence not certified before the 15th April next shall be submitted.

(6) The papers set forth in Ont. Sess. Pap., 1882, No. 69, and the subsequent correspondence between the Province of Ontario and the Dominion in Ont. Sess. Pap., 1883, and numbered 23, and any other correspondence between the said two Governments which either party may desire, may also be submitted *quantum valeat*.

(7) The Province of Ontario undertakes the printing for the Privy Council of the Book of Arbitration Documents, the cases submitted to the Arbitrators, the Orders of Reference, the Award, the said Acts of the Legislature of the Province, the papers referred to in the preceding paragraph, and any other documents which may be put in on the part of that Province under this Agreement.

(8) The Province of Manitoba undertakes the printing for the Privy Council of the documents reported by the Select Committee, Chief Justice Sewell's notes on the De Rheinard case, and any other documents which may be put in on the part of that Province.

(9) Either Government may, at its own discretion, print any of the papers and documents to be submitted in addition to those which the said Government undertakes to print.

(10) Any such documents or papers printed, or purporting to be printed, by the Queen's Printer (at Toronto, Winnipeg or Ottawa), shall be deemed sufficiently authenticated, *prima facie*, for the purposes of the said case.

(11) All papers for the Privy Council shall be printed as aforesaid in due form, and shall be delivered on or before the 15th of May next to the proper officer for the use of the Privy Council, and to the Solicitors in London for the opposite party.

(12) Any maps that either Government deems useful for the argument before the Privy Council shall be prepared and lithographed on the part of such Government ; and,

having been duly authenticated either by mutual agreement or by reference to the Judges or Judge aforesaid, copies shall be delivered with the printed papers and documents aforesaid.

(13) Each and every of the said papers and documents is to be submitted to the Privy Council *quantum valeat*, and not otherwise.

(14) Nothing herein contained is to be construed as an admission that a Court, in order to ascertain its own jurisdiction in the Disputed Territory, or some part thereof, might not take judicial notice of the said particulars, or some of them; and it is hereby agreed that, in the discussion of the case before the Privy Council, reference may be made to any evidence of which such judicial notice may be taken, whether the same is or is not contained in the printed papers.

33. The printing or not printing of any of the documents or other evidence is not to postpone the setting down of the joint case or the application therefor, or the argument, or the decision of the case, unless the Judicial Committee of the Privy Council shall, on special application, and after notice (so that counsel for both Governments may be heard thereon) see fit to direct such postponement.

34. Any order to set down and any other paper necessary to be served on either of the said Governments, may be served on the London solicitors of such Governments, such solicitors of the said Province of Manitoba being Messrs. Bischoff, Bompas & Dodgson, 4 Westminster Buildings, London, E.C., and of the said Province of Ontario, being Messrs. Freshfields & Williams, 5, Bank Buildings, London, E.C.

35. The decision of the Privy Council shall be carried into full effect by such (if any) future legislation as may be necessary, or as may be recommended by the said Judicial Committee.

36. If in any suit or proceeding within Provincial Jurisdiction the boundary between Ontario and Manitoba do in the meantime come in question, the Court or other judicial authority before which the question arises is, in dealing therewith, to take judicial notice of all the documents and facts which it is above agreed to submit to the Privy Council on the same question, and without the said documents and facts being put in evidence before such Court or other Judicial authority, and is to have power to draw such inferences from the said documents and facts as may be necessary.

37. To give legal effect to the present agreement the Government of each Province will introduce at the next Session of the Legislature thereof, and procure to be passed, a Bill in the terms of the Bill in that behalf, hereunto annexed.

38. The costs of the reference shall be in the discretion of the Judicial Committee of the Privy Council, which is to have power to award or withhold costs.

39. The said Agreement is understood to be entered into on the part of the Ontario Government without prejudice to any question which there has been, or may be, between the Dominion and Ontario Governments in relation to the territory in dispute between them, or in relation to any matters which have been the subject of negotiation or correspondence between the Dominion and Ontario Governments, and the rights or claims of the Province of Ontario as to the same, are hereby expressly reserved.

O. MOWAT.

JAMES A. MILLER.

TORONTO, 18th December, 1883.

IN THE PRIVY COUNCIL.

In the matter of the Boundary between the Provinces of Ontario and
Manitoba, in the Dominion of Canada.

BETWEEN

THE PROVINCE OF ONTARIO,

of the one part,

AND

THE PROVINCE OF MANITOBA,

of the other part.

JOINT CASE.

The Province of Manitoba claims that the boundary between that Province and the Province of Ontario is the meridian of the confluence of the Ohio and Mississippi Rivers.

The Province of Ontario claims that the westerly boundary of that Province is either the meridian of the most north-westerly angle of the Lake of the Woods, or is a line west of that point.

It has been agreed to refer the matter to the Judicial Committee of Her Majesty's Privy Council, and the Appendices contain the material agreed to be submitted for the adjudication of the dispute.

Appendix "A" contains the evidence which was collected and printed for the purposes of the arbitration, and is referred to elsewhere as the Book of Arbitration Documents.

Appendix "B" contains the Orders of Reference, the Cases submitted to the Arbitrators, and the Award.

Appendix "C" contains correspondence and other documents, forming No. 69 of the Sess. Pap., Ont., 1882.

Appendix "D" contains some subsequent papers and correspondence, forming No. 23 of Sess. Pap., Ont., 1883.

Appendix "E" contains additional documents submitted on the part of the Province of Manitoba.

Appendix "F" contains additional documents submitted on the part of Ontario.

Each and every of which papers and documents have been agreed to be submitted to the Privy Council *quantum valeat*, and not otherwise.

Appendix "G" contains the agreement between the Governments of Ontario and Manitoba, in pursuance of which the present reference is made.

The questions submitted to the Privy Council are the following:—

(1) Whether the Award is or is not, under all the circumstances, binding.

(2) In case the Award is held not to settle the boundary in question, then what, on the evidence set forth in the Appendices, is the true boundary between the said Provinces.

(3) Whether in case legislation is needed to make the decision effectual or binding, Acts passed by the Parliament of Canada, and the Provincial Legislatures of Ontario and Manitoba, in connection with the Imperial Act, 34-5 Vic., c. 23, or otherwise, will be sufficient, or whether a new Imperial Act for the purpose is necessary.

REGISTRAR-GENERAL'S OFFICE, ONTARIO,

TORONTO, December 23rd, 1883.

To His Honour the Honourable John Beverley Robinson,

Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

In compliance with the Statute in that behalf, the undersigned respectfully presents to Your Honour the Annual Report of Births, Marriages and Deaths for the year ending 31st December, 1882.

Respectfully submitted,

ARTHUR S. HARDY,

Registrar-General.

REPORT

RELATING TO THE

Registration of Births, Marriages, and Deaths

IN THE

PROVINCE OF ONTARIO,

FOR THE YEAR ENDING 31ST DECEMBER, 1882.

PARLIAMENT BUILDINGS,

TORONTO, December 23rd, 1883.

*To the Honourable A. S. HARDY,**Registrar-General, Province of Ontario.*

SIR,—I have the honour to submit the Annual Report relating to the Registration of Births, Marriages and Deaths, in the Province during the year ending 31st December, 1882.

The total number of Births, Marriages and Deaths, registered during the year 1882, was 77,678, an increase of 1,037, or 1.3 per cent. over the number registered in 1881.

The number of Births registered was 42,429, as against 40,714 in 1881, shewing an increase of 1,715, or 4.2 per cent. 13,449 Marriages were solemnized in 1882, an increase of 343, or 2.6 per cent., over the number registered in 1881. The number of Deaths recorded during the year 1882 was 21,800. In 1881, the number returned was 22,821, shewing a decrease of 1,021, or 4.4 per cent.

TABLE I.—TABLE SHEWING THE TOTAL NUMBER OF BIRTHS, MARRIAGES, AND DEATHS IN EACH COUNTY OF THE PROVINCE OF ONTARIO IN 1882, WITH THE INCREASE AND DECREASE.

COUNTIES.	Number of Births, 1882.	Increase over 1881.	Decrease.	Number of Mar- riages, 1882.	Increase over 1881.	Decrease.	Number of Deaths, 1882.	Increase over 1881.	Decrease.	Total number of B. M. and D., 1882.	Total number of B. M. and D., 1881.	Increase.	Decrease.	BIRTHS. Ratio to 1,000 Population.	MARRIAGES. Ratio to 1,000 Population.	DEATHS. Ratio to 1,000 Population.

† Yorkville not included, as its incorporation with Toronto did not come into force until Jan. 1883.

REMARKS ON TABLES 1, 2, AND 3.

These tables contain the number of births, marriages, and deaths registered in Ontario in 1882; the full particulars will be found in the Appendix to this Report.

BIRTHS.

Increased returns of births over those of 1881 have been received from 25 of the 39 counties.

The ratio of births to 1,000 persons living is 22, and fifteen counties return a higher ratio and 24 a lower.

The State of Rhode Island, in which registration laws have been in operation for 28 years, shew by their reports a ratio of 24 births to 1,000 of the population.

In Vermont, registration laws have been in force since 1857; the birth rate of this State, according to their reports, is 21 per 1,000.

In Massachusetts, the registration of vital statistics has been carried on since 1850. Their reports shew a birth rate of 23 per 1,000, so it will be observed that the number of births registered in Ontario compares favourably with the numbers registered in these States, especially when it is considered that many of the counties in Ontario have been settled very recently, and it is found difficult to get returns from sparsely settled districts. The returns shew that there was in the whole Province one birth to every 45 of the population. In several counties this proportion was exceeded; thus Carleton returned one birth to every 35.5 of its population; Essex, Prescott and Russell, (united) and Waterloo, one in every 34; Wentworth, one in every 39.6; York, one in every 36.2. In some of the other counties the proportion was less. Elgin only returned one birth to every 60 of the population; Hastings, one in every 58.6; Northumberland and Durham (united), one in every 56.6; and Stormont, Dundas, and Glengarry (united), one in every 64.4 of the population.

The births registered in the cities and towns are much greater in proportion to population than in the whole Province.

The total number of births in these cities and towns was 8,323, or a ratio of 26.2 per 1,000 of the population, a ratio greater by 4.1 than that of the whole Province. This may be accounted for by the fact that registrations are generally more complete in cities and towns than in rural districts.

Much variation is observed in the birth rate even in the cities and towns; in some it was higher than the rate for the whole 26.2 per 1,000, and others lower. Ottawa, for instance, returned a ratio of 38.0 births per 1,000; Milton, a ratio of 33.8 per 1,000; Brampton, 34.2 per 1,000; Pembroke, 46.1 per 1,000; Berlin, 32.6 per 1,000; and Toronto, 30 per 1,000, while L'Orignal only returns 11.7 per 1,000, and Orangeville 14 per 1,000. Incomplete registration was doubtless the cause of this low birth rate in these towns.

MARRIAGES.

There is an increase in the number of marriages registered both in the cities and towns, as well as in the whole Province. Fairly good times doubtless tended to increase the marriage rate.

The careful registration of the marriages made by clergymen is, however, the principal cause of the now complete registration of this branch of vital statistics; and, if parents, physicians, and others were as conscientious in discharging their duties in reference to the registration of births and deaths as clergymen are to register marriages, the objects for which the Act was established would be attained.

The ratio to population of marriages in the whole Province was 7 per 1,000. In the cities and towns it was 12.4 per 1,000.

The cause for the higher ratio in the cities and towns has been explained in previous reports, viz., "That parties residing in the rural districts generally resort to the cities and towns to have their marriages solemnized."

In the counties, Waterloo returned the largest ratio, 9.3 per 1,000. Six counties—Carleton, Hastings, Kent, Middlesex, Wentworth, and York, return 8 per 1,000, all of them except Kent include large cities.

The lowest ratio in any county, 5.3 per 1,000, was returned from Perth. Seven counties had ratios between 5 and 6 per 1,000, viz., Algoma, 5.4; Grey, 5.7; Haldimand, 5.9; Huron, 5.4; Perth, 5.3; Renfrew, 5.9; and Welland, 5.8.

In the returns from the cities and towns, Picton returned the largest ratio of marriages, 24.9 per 1,000, and there are four other towns that returned a marriage rate of over 20 per 1,000, viz., Perth, 23 per 1,000; Napanee, 22.8 per 1,000; Cornwall, 20.6 per 1,000; and Berlin, 20.7 per 1,000. There was only one marriage returned from the town of L'Original for 1882. The next lowest returns were from Stratford, 6.4 per 1,000; Brockville, 6.7 per 1,000, and St. Catharines, 6.5 per 1,000.

DEATHS.

In 1881 the number of deaths returned was considerably in excess of the previous year (1880). In 1882 there were 1,021 less deaths registered than in 1881. Twelve counties returned an increase in the number of deaths registered, and twenty-seven a decrease. The largest increase returned from any county, 362, was from Carleton. The cause of this very large increase is explained further on in the report. The County of Grey returned an increase of 100 deaths, registered in 1882. Ten other counties also returned larger returns of deaths, although the increases were small. Middlesex returned 389 less deaths registered in 1882 than in 1881. This decrease is more apparent than real; the returns for 1881 were unusually large, owing (as stated in last year's report) "to the sad accident which occurred on the River Thames, near London, in that county, by the upsetting of the steamer 'Victoria,' when nearly 200 persons lost their lives." The death rate for 1882 having returned to its normal state, the decrease is fully accounted for. The following counties also returned fewer deaths in 1882 than in 1881, viz.: Essex, 165 less; Lambton, 115 less; Stormont, Dundas, and Glengarry, (united) 92 less; Ontario, 86 less; Brant, 86 less, and Wentworth, 83 less. The decreases in other counties were small. The ratio of deaths per 1,000 in the whole Province was therefore less in 1882, being 11.3 per 1,000, while in 1881 it was 12. per 1,000.

The returns from the State of Rhode Island shew a death rate of 18 per 1,000, Michigan 13.9 per 1,000, and Massachusetts, 19.3 per 1,000.

Carleton County returned the highest death rate, 23.6 per 1,000. The Counties of Prince Edward, York, and Wentworth, had an average death rate of 16 per 1,000. The lowest rate of mortality was returned from Algoma, 6.7 per 1,000, but many returns were not received from the unorganized portions of this district; Lanark returned only 7.2 per 1,000, and Elgin only 7.5. The Counties of Bruce, Grey, Lambton, Renfrew, Simcoe and Stormont, Dundas and Glengarry (united), averaged only 8 per 1,000, about one-half of what is supposed to be the actual death rate of Ontario. Turning to Table No. 2, "Return of Deaths from the County Towns," much more reliable data appear to have been furnished, although, in some instances, the death rate returned was unusually large, and in others remarkably low. The total increase in the number of deaths in these places was 69. The largest increase was from the City of Ottawa, 388, and was chiefly caused by the deaths of infants which took place in a lying-in hospital being registered in 1882, whereas, in former years, no returns of any deaths were received from this institution. This increase swelled the death rate to 44.9 per 1,000, but as the mothers of these deceased children were only temporary residents of Ottawa it does not appear just that these deaths (which took place so soon after birth), should be taken into account when determining the death rate of the city.

Toronto and Kingston returned an increase in the number of deaths of 40 and 30 respectively, the other increases in the cities and towns were small in number—7 of the cities and 18 of the towns had less deaths in 1882 than in 1881. The ratio of deaths, to 1,000 of the population, was, in the cities and towns, 19 per 1,000; in 1881 it was 18.8 per 1,000.

The total number of deaths registered in the ten cities was 4,960, this gives a ratio of 21.4 per 1,000 of the population in these places; but this includes the very high ratio, 44.9 per 1,000 returned by Ottawa. Eliminating Ottawa from the list the ratio would shew 18.2 per 1,000. Brampton returned a very high death rate, 30.1 per 1,000.

There are three places where the ratio of deaths was between 20 and 23 per 1,000, viz.: Kingston, 22.2; Brockville, 20.1; Toronto, 20. Two towns, Pembroke and Berlin, had a ratio of 19 per 1,000. The lowest mortality was reported from the three towns L'Original, Walkerton and Welland, 7.0 per 1,000.

There was one death to every 88.2 of the population of the Province. Carleton County returned the largest proportion, one in every 42. Prince Edward and York were the next highest, the former 1 in 60 the latter 1 in 62. Lanark returned the lowest proportion, 1 in every 137.5. The Counties of Elgin, Bruce, Stormont, Dundas, Glengarry (united), Lambton, Grey, Simcoe, and Renfrew were also low, ranging from 1 in 133 to 1 in 120 of the population.

In the cities the proportion was much larger, shewing 1 death in every 52.6 of the population. In Ottawa it was extraordinarily large, 1 death in every 22 of the population; the cause of this has already been explained. Brampton was also high, 1 in every 33.2. L'Original only returns 1 in every 142, and Walkerton only 1 in 137, and Welland 1 in every 133.

(Remarks on Tables 4, 5, 6, 7, 8, 9 and 10.)

The proportion between male and female births in the different months of the year was marked by variations, as in former years. In 1881, August returned the largest proportion of male to female births, 113 males to 100 females. In 1882 the births returned in December shew the greatest difference between the sexes, 118·2 male births to 100 female births. August comes next with 108·9 males to 100 females ; there was no difference in the proportion in the months of May and June, 107·9 to 100 being the relation in each month. February is nearly the same 107·0 to 100.

The lowest proportion was in July, 102·8 male births to 100 female births.

For the whole year the difference was 6·6 in favour of the males, that is, of the whole number of births, 42,429, there was 106·6 male births to every 100 female births. March almost invariably returns the greatest number of births, and this year is no exception. June returned the lowest. March returned 3,926 births, and June, 3,130, a difference of 796 in favour of the former month.

November generally returns less births than any month in the year ; in 1880 it had the lowest return but one ; in 1881 the lowest, and in 1882 the lowest but one.

The difference between the number of male and female births in the ten cities of Ontario is rather more than in the whole Province, the proportion being 107·8 males to 100 females.

There was also an excess of male births in every month in the whole Province, but in the cities there were more female births than male births in the months of May, October and November. In May there were fourteen more female than male births, in October twenty-six more, and in November ten more.

September was the most prolific month, and June the least so, in the cities.

As usual, the first quarter of the year returned the largest number of births, and the second quarter the least.

The percentages of births in each quarter to the whole number were as follows:— First quarter, 26·2, second quarter, 23·6, third quarter 25·6, and fourth quarter 24·5.

TABLE 11.
ILLEGITIMATE BIRTHS, TWINS AND TRIPLETS.

YEAR.	ILLEGITIMATE BIRTHS.			No of Twins.	No of Triplets.

1881.....	748	“ 54 “	18.3	384	3
1882.....	966	“ 43 “	22.7	389	5
Average for the eleven years..	478	One in every 89 Births.	11.5	321	2

The very large number of illegitimate births registered in 1882, 966, may be attributed to the increased number returned from the city of Ottawa, there having been no less than 319 illegitimate births returned in 1882, whereas in 1881 only eight were so returned. Nearly all these illegitimate births took place in a public institution in Ottawa ; had it not been for these returns, the illegitimate birth rate for the whole Province would have been lower than it has been for several years.

The number of pairs of twins reported in 1882 was 389, five more than in 1881, but still eighteen less than in 1880. Five cases of triplets were registered, one in each of the following counties :—Middlesex, Norfolk, Northumberland, and Durham (united), Oxford and Peterborough.

MARRIAGES.

MARRIAGES.

(See Appendix, page xii. to xxix).

TABLE 12.—MARRIAGES BY DENOMINATIONS.

Of the whole number of persons married in 1881, the percentage of those whose religious denominations were given were as follows :—

35.28	per cent.	(or 1 in every 2.83)	were	Methodists.
20.06	"	"	4.98)	" Presbyterians.
17.71	"	"	5.64)	" Episcopalians.

No date given	57	No date given	58
Total	13106	Total	13449

The average number of marriages, per quarter, for 1882 was 3,362.
" " " " month, " 1,121.
" " " " week, " 258.
" " " " day, " 37.

(Remarks on Tables 12, 13 and 14.)

There were 343 more marriages recorded in 1882 than in 1881 ; in all, 13,449 marriages or 26,898 persons married. Of this number, 9,496 (4,686 males and 4,810 females) 35.30 per cent. of the whole number married were Methodists ; they far outnumbered any other denomination ; Presbyterians come next with 5,469, or 20.33 per cent ; Episcopalians follow with 4,673 or 17.37 per cent. ; and then Roman Catholics with 3,602, or 13.39 per cent.

December and October maintain the same position, as in former years, of being the favourite months for marrying in Ontario—2,913, or 21.6 per cent. of all the marriages, were solemnized in these two months.

August and July alternately return the lowest number of marriages. In 1882 August was the lowest. In 1881, July held that position.

The ratio of marriages to 1,000 of the population for 1882, was 7.0.

As is generally the case, those counties in which the cities and towns are situated, returned a larger number of marriages, and a higher ratio than the average of the whole Province.

The Counties of York, Wentworth, Hastings, Middlesex and Carleton, containing the cities of Toronto, Hamilton, London, Belleville and Ottawa, shew a marriage rate of eight to nine per 1,000 of their population, while the Counties of Algoma, Renfrew, Haldimand, Welland and Grey, in which no cities or large towns are situated, returned only a marriage rate of from five to six per 1,000. (See Table 1.)

The cities returned the largest number of marriages, but have not as large a ratio to population as some of the towns. Toronto, Hamilton, London, Belleville and Ottawa, five of the principal cities, returned a ratio of from eleven to fifteen marriages per 1,000 of the population, while the towns of Picton, Perth, Napanee, Cornwall and Berlin shew a marriage rate of between twenty and twenty-four per 1,000. (See Tables 2 and 3.)

TABLE 15—MARRIAGES BY AGES.

The proportion of males to females married during the different quinquennial periods of life, for the years 1881-1882, to the whole number of marriages, is shewn in the appended table :—

QUINQUENNIAL PERIODS OF LIFE.	1881.				1882.

MARRIAGES BY AGES.

(See Table 15.)

Only 175 youths were married under 20 years of age, while no less than 2,808 maidens were united at that early age.

Between 20 and 25 the same relative proportion between males and females continued but not to so great an extent. 6,659 females and 5,072 males were married at that period of life.

In the next period, between 25 and 30 years, the proportion is changed, and now it is found that more young men were married than females; the numbers being 4,758 males to 2,516 females.

Between 30 and 35 this proportion becomes larger—1,657 males to 681 females, and the relation continues the same, in all the remaining periods. The only two periods, therefore, in which the females outnumbered the males were under 20, and between 20 and 25.

(See Table 16.)

In several instances men were married to women many years their juniors, but few instances occur where women married men more youthful than themselves.

Several cases are reported of persons having been married who had reached the allotted age of life—threescore years and ten. Two couples were married whose united ages in each case were 144. One was a farmer, aged 80, who took a wife aged 64; the other was a clergyman of 76 married to a lady aged 68 years. The greatest disparity in the ages of any one couple married was that of a farmer aged 74, who married a girl of 20 years.

Widowers seem to have been more fortunate in obtaining wives than widows were in finding husbands, as 1,434 widowers were married in 1882, and only 695 widows.

DEATHS AT DIFFERENT AGES AND MONTHS.

(See Table 17.)

As the number of deaths registered in the Province in 1882 was 1,021 less than in 1881, a decrease in the several periods of the year will be found, but not in all. Four periods, viz.: from five to ten years, fifteen to twenty, sixty to seventy years, and ninety to one hundred, and over, shew an increase; and it is gratifying to find that the decrease in the number of those who lived to be seventy and upwards, was very small. In 1882, 3,475 persons reached the age of 70, and upwards, against 3,592, in 1881. From eighty to ninety years 1,250 deaths were registered, as compared with 1,269 in 1881; and from ninety to one hundred years, and over, 273 deaths occurred in 1882, and 265 in 1881. The largest decrease in the different periods of the year was "at and under one year," and from "one to five."

(See Table 18 and 19.)

March is generally the most fatal month in the year. In 1880 it was highest in the list, in 1881 it was third, and in 1882 it has again resumed the highest place, the returned shewing that 1,135 males and 1,041 females, in all 2,176, nearly ten per cent. of all the deaths, were recorded in this month.

The least mortality in any month was in November. In 1881 it was in June.

The first quarter of the year, which includes the fatal month of March, returned more deaths than either of the other quarters. The number registered was 5,930, or 27.2 per cent. of all the deaths in the year. The last quarter recorded the fewest deaths. The difference between the number of deaths registered in the first and second half of the year was considerable; the first half exceeds the second half by 1,040. In 1881 the second half of the year exceeded the first half by 731.

THE DEATH WAVE OF THE YEAR.

In the years 1880 and 1881 the mortality was low in January ; in 1882 it was nearly the highest ; therefore, in noticing the death wave from month to month, we commence with the high point in January with a mortality of 1,929, (112 more than in the previous December). In February a fall in the wave appeared, the number of deaths being 104 less than in January ; but, if the difference in the length of the months is taken into consideration, the mortality would have been nearly the same in February as in January. A rapid rise in the wave took place in March, where it reached the highest point in the year, 2,176 deaths having been recorded in that month—247 more than in January, and 637 more than in November, the lowest month.

The wave then gradually descended through April and May. In June there was a very marked fall, 389 less deaths than in May, and only 42 more than in the lowest month—November.

In July the wave ascended, the returns shewing 107 more deaths than in June, and kept rising through August, the increase being 151 deaths in advance of July. The wave then descended gradually through September and October, but made a very rapid descent in November, reaching the lowest point in the year, only 1,539 deaths having been registered in this month—nearly thirty per cent. less than in March, the highest month. A change took place in December, and the wave rose rapidly, and 235 more deaths were reported than in November.

The two special features in the death wave in the year were, first, the high point maintained throughout the first five months of the year. These five months returned 9,839 deaths, or forty-five per cent. of the whole number of deaths ; and second, the low mortality in the month of November, only 1,539 deaths, or seven per cent. being reported during this month.

In 1881 the lowest month was June. It will be seen that in 1882 the greatest mortality in the year was during the wet months of spring. It has been so for several years, but there does not appear to have been a correspondingly high mortality in the fall months, which has usually been the case.

TABLE 20.

The following is a Record of the Ten Highest Causes of Death for the years 1871, 1872, 1873, 1874, 1876, 1877, 1878, 1879, 1880, 1881, and 1882.

CLASSIFIED CAUSES OF DEATH.

(See Appendix Page xxxii to lxxiii.)

In this report a new classification of diseases has been used ; it is similar to the one adopted by the Provincial Board of Health, and is divided into five classes with various sub-divisions.

The following Table shews the names of the different classes, also the number of deaths in each class with per centages :—

CLASSES.	Deaths, 1882.	Percent'ge to whole number of deaths.	Deaths to 1,000 of population
Class I.—Zymotic diseases	4670	21.4	2.42
Class II.—Constitutional diseases.. ..	5715	26.2	3.00
Class III.—Local diseases	7001	32.1	3.64
Class IV.—Developmental diseases	2842	13.1	1.48
Class V.—Violent Deaths.....	869	4.0	0.45
Cause not specified.....	703	3.2	0.36
Totals.....	21800	100.0	11.35

EXPLANATION OF THE DIFFERENT CLASSES.

CLASS I.—Zymotic diseases, a term proposed by Dr. Farr, and is usually employed as synonymous with preventible, and includes all those diseases such as Measles, Scarlatina, Diphtheria, Dysentery, Cholera Infantum, Bilious, Typhoid, and Typhus fevers and Smallpox, which occur as endemics or epidemics.

CLASS II.—Constitutional diseases, which include Anæmia, Cancer, Rheumatism, Dropsy, Gout, Abscess, Hydrocephalus, Scrofula and Phthisis or Consumption.

CLASS III.—Local diseases, under which are included all those diseases in which the functions of particular organs of the system are disturbed, such as Epilepsy, Apoplexy, Convulsions, Paralysis, Insanity, Heart Disease, Congestion of the Lungs, Bronchitis, Pleurisy, Pneumonia, Disease of the Stomach, Liver and Kidneys, etc.

CLASS IV.—Developmental diseases are those incidental to women, children, and old people.

CLASS V.—Violence, deaths which are caused by wounds, burns, drowning, poison, hanging, suicide, murder, etc.

REMARKS ON THE DEATHS IN CLASS I.

The deaths from the various diseases in this class numbered 4,670, or 21 per cent. of the total number of deaths.

Diphtheria returned the highest number, 1,239 (606 males and 633 females), an increase of 68 over 1881, and as the number of deaths returned in 1882 was less than in 1881, the increase was comparatively larger. In 1881 the percentage to all deaths was 5.3, in 1882 5.6 The month of January returned the highest mortality from this disease, 165. In 1881 November held that position with 182 deaths; August was the lowest month in both years.

Respecting the ages of those who died from this disease, it is found that more died between the ages of 1 and 15 than in all the other periods of life combined. Five hundred and forty-eight (280 males and 268 females), or 44 per cent. died between 1

and 5 years; 350 (170 males and 180 females), or 28 per cent. died between 5 and 10 years, and 136 or 10 per cent. died between 10 and 15 years, in all, 1,034 or 83 per cent. died from Diphtheria between 1 and 15 years. In 1881 there were 1,171 deaths or 82 per cent. of the whole registered from this disease during the same period.

In the following counties this disease was prevalent:—Elgin returned 29 deaths, or 9.1 per cent. of all the deaths in this county; Leeds and Grenville (united), 79, or 12.2 per cent.; Prince Edward 48, or 13.8 per cent.; Stormont, Dundas and Glengarry, (united), 50 or 9.2 per cent. In the counties of Halton, Huron, Frontenac, Dufferin, and Haldimand, the percentage of deaths from Diphtheria was not quite 4 per cent.

The city of Toronto returned 57 deaths, or 3.2 per cent. from Diphtheria; Ottawa 60, or 4.8 per cent. The town of Picton 16, or 28.5 per cent.; Brockville 25, or 16.1 per cent.; Windsor 10, or 6.7 per cent., while there are several towns which have not returned any deaths from this disease. Diphtheria stands fifth in the ten highest causes of death in the Province; in 1881 it was fourth.

Typhoid Fever ranks next highest in this class with 555 deaths (318 males and 237 females). The most fatal month was October with 77 deaths, the least so June with only 13 deaths. More deaths from this disease occurred between the ages of 20 and 30 years than in any other period, numbering 148 (83 males and 65 females). The periods 15 to 20 years and 30 to 40 years also returned a high mortality, 74 and 67 respectively. It will thus be seen that the periods ranging from 15 to 40 years returned 289 deaths from this fever, which is 23 more than the total number of deaths in all the other periods.

The county of York returned 84 deaths, or 3.4 per cent. from Typhoid fever; Middlesex, 39 deaths or 3.5 per cent.; Kent, 31 deaths or 5.2 per cent.; Ontario, 30 deaths or 6.0 per cent.; Lambton, 23 or 5.3 per cent.; Oxford, 23 or 3.8 per cent. Although the county of York returned more deaths from this cause than any other county, it does not follow that the disease was more prevalent there, as the percentage was less than in many counties that returned fewer deaths from this cause. The counties of Lanark, Norfolk, Prince Edward, Stormont, Dundas and Glengarry, (united) and Renfrew reported few deaths from Typhoid fever.

The total number of deaths from this disease in the cities and towns was 191, or 2.8 per cent. of all the deaths. Toronto returned the highest number, 61, but not the highest percentage, being only 3.5, while the town of Sarnia returned only 7 deaths from this disease, but the percentage to the total deaths in that town was 16.2. The numbers returned from London was 22, or 6.9 per cent.; Ottawa, 20 deaths or 1.6 per cent.; Hamilton, 17 deaths or 2.6 per cent. Kingston and Stratford returned each 7 deaths, but the percentages were very different—in Kingston it was only 2.2 of the deaths, in Stratford it was 9.8 per cent. Two cities, St. Catharines and Brantford, and eight towns, Chatham, Brockville, Goderich, Collingwood, Simcoe, Walkerton, Welland, and Milton, do not report any cases of deaths from this fever. The town of Whitby returned 6 deaths with a percentage of 12.7.

The deaths were the most numerous in the months of October, November, December, combined, they numbered 202, or 36 per cent. of all the deaths. The disease stands seventh in the ten highest causes of death in the Province, but last in the list for the cities and towns.

Scarlet Fever follows Typhoid Fever very closely in numbers. The deaths from it numbered 543, or 2.4 per cent. of all the deaths in the Province. The month of March returned the highest number, 99, or 18 per cent. January also returned a large number—77, or 14 per cent. February, May, and June returned 57, 65, and 60 respectively. The first six months of the year was more fatal than the second, 410 deaths being returned for that period, and only 133 for the second half year. The first quarter returned 233 deaths, and the second 177, thus showing that this disease was chiefly confined to the early part of the year.

In noticing the ages of these decedents, it is found that the largest proportion of those who died of this disease were children, 47 died under the age of one year, 300 between the ages of one and five years, and 165 between the ages of five and fifteen years. Therefore, of the 543 deaths from Scarlatina, 512 died under fifteen years of age; none died over fifty years of age, and only 24 over the age of fifteen years.

This disease was very prevalent in the county of Grey, 87 deaths, or 14·8 per cent. were reported. It also prevailed to a large extent in the county of Oxford—44 deaths or 7·3 per cent. Essex returned 33 and Huron 28 deaths from this cause. It stands eighth in the ten highest causes of death, but does not appear at all in the lists for the cities and towns. More males than females died from this disease.

Diarrhœa caused the death of 497 persons (264 males and 233 females). July, August, and September, generally the hot months of the year, were the most fatal. These three months returned a mortality of 347, or 70 per cent., while October returned only 47 deaths from this cause. The number of deaths in the other months, with the exception of February, which only returned 6, ranged from 13 to 19. Two hundred and ninety-two, or 58 per cent. of these decedents were infants under the age of one year, and 108, or 21 per cent., were between the ages of one and five, so that 400 of the 497 deaths—80 per cent.—were children under five years of age. Of the remaining 97 deaths, 64 were of old people, whose ages were between 50 and 90 years and over.

The county of York returned 76 deaths from *Diarrhœa*, or 3 per cent. of all the deaths in the county; Wentworth 42, or 3·9 per cent.; Stormont, Dundas, and Glengarry, (United) 20, or 3·7 per cent.; Middlesex, 38, or 3·4 per cent.; Kent 19, or 3·2 per cent.; Carleton 47 or 3·1 per cent. The lowest returns were from the counties of Haldimand, 4, or 1·7 per cent.; Norfolk, 2, or 0·5 per cent.; Victoria, 3, or 0·9 per cent.; Welland, 3, or ·08 per cent. The per centage of all the deaths from this cause to the total deaths from all causes, was 2·3 per cent. In the cities and towns it was 3·5 per cent. This larger proportion of deaths from *Diarrhœa* in the cities and towns was no doubt caused to a great extent by the use of impure water and unripe fruit. Toronto returned 70 deaths, 4·0 per cent.; Hamilton, 28, or 4·4 per cent.; Ottawa, 40, or 3·2 per cent.; London, 20, or 6·3 per cent.; Kingston, 11, or 3·5 per cent.; while the towns of Strathroy and Pembroke returned 3 and 6 deaths respectively, or a per centage of 10·3, and 11·1 per cent. from this cause, so that the mortality from this disease was proportionally greater in these two towns than in the cities above mentioned.

This disease stands ninth in the list of the ten highest causes of death in the Province, and sixth in the list of the cities and towns.

Croup.—Four hundred and sixty-nine deaths from this disease were registered in 1882, (255 males and 214 females). The first four months returned 226 of these deaths, nearly one-half the whole number. In 1881 the last quarter of the year was the most fatal. Nearly all died young, 449 of the number were children between one and ten years. The deaths from this cause were not numerous enough to give it a place in the list of ten highest causes of death. More males died than females.

Cholera Infantum.—There were 363 deaths registered from this cause, 184 males and 179 females. The three months, July, August and September, together, returned more decedents than all the other months combined. July returned 65, August 133, and September 96—in all 294. All but 2 died under five years of age. The males numbered 5 more than the females. No other disease in this class calls for any particular notice.

CLASS II.—*Constitutional Diseases*.—The most important disease in this class is Phthisis or Consumption, it stands in 1882 at the head of the ten highest causes of death, as it has done for many years, and notwithstanding all the efforts to arrest its progress it seems to be on the increase. There were 67 more deaths from it in 1882 than in 1881, and, in consequence of the decrease in the total number of deaths returned, the rate per cent. was increased from 10·8 to 11·3 per cent. It affected both young and old, particularly the young, between 20 and 30 years of age. It spread through every month of the year, though with considerable variation. The spring months exceeded the other months to a small extent. March returned the highest number of deaths from this disease, 240, and August the lowest, 167, a difference of 73; 376 more females died than males. The highest number of deaths from Phthisis was returned from the county of York, 267, but its per centage to the total deaths in the county was only 10·8 per cent., not equal to the average; the next highest was Carleton, with 149 deaths, or a per centage of only 9·8. Middlesex follows, with 127 deaths, or 11·5 per cent.; a little above the average. Wentworth was nearly the same, 120, or 11·2 per cent. These counties

have large cities within their boundaries. The following counties come next in numerical order, several large towns are within their boundary, but no cities ; their death rate from Phthisis was very high. Northumberland and Durham (united) registered 103 cases, 14·9 per cent. of all the deaths ; it was 15 per cent in 1881. Leeds and Grenville, (united) 96, or 14·8 per cent.; 15 per cent. in 1881. Huron, 90, or 13·1 per cent.; it was only 9 per cent. in 1881. Stormont, Dundas and Glengarry (united), 90, or 16·7 per cent.; against 13 per cent in 1881. Lincoln returned the highest death rate from this cause, 68, or 17 per cent.; in 1881 it returned 66, or 14 per cent. Prince Edward also had a very high rate, 51, or 14·6 per cent.; it was the highest in 1881, with 17 per cent. The following counties returned a low mortality from this disease : Renfrew, 19 deaths, or 5·8 per cent. of all the deaths in that county ; Lambton, 28, or 6·5 per cent.; Perth, 39, or 7·6 per cent.; Grey 47, or 8 per cent.; Muskoka and Parry Sound, 25, or 8·7 per cent., and Halton 23, or 8 per cent. All these counties returned similar low rates in 1881, except Renfrew, which numbered 42 deaths, or 12 per cent.

This scourge of human life is evidently on the increase, a steady rise is noticed in every year since 1878 ; in 1879 the number was 2,065, in 1880, 2,154, in 1881, 2,397, and in 1882, 2,464 ; an increase in four years of 465, or 23 per cent. The great mortality from Phthisis, both in this and other countries, has been for some years the thought and study of the greatest scientists of the day, but so far their efforts have not been successful in devising means for checking the growth of this insidious and distressing malady. There were 804 deaths, or 11·9 per cent. of all the deaths, (6,752) from Phthisis in the cities and towns. Twenty-three of these places returned a higher rate. As usual, Toronto returned the largest number of decedents from Phthisis—208, or 12 per cent.—but this rate was exceeded by several cities and towns with less number of deaths. Ottawa was next in numbers, with 105 deaths, or 8·5 per cent.; Kingston returned 42 deaths, or 13·4 per cent.; London 36, or 11·4 per cent.; Guelph and Brantford each returned a death rate of 15 per cent. from Phthisis ; St. Thomas reported the fewest deaths of any city, 5 deaths, or 6·1 per cent. In many of the towns the rate was very high. Bowmanville had 16 deaths, or 25·8 per cent.; Perth 9 deaths, or 25 per cent.; Cornwall, 16, or 24·2 per cent.; Cobourg, 11, or 20·3 per cent.; Simcoe, 6, or 19·3 per cent. No deaths from this cause were returned from Milton or Welland, Pembroke and Sarnia only returned 2 each or 3·7 and 4·6 respectively ; Whitby 3 or 6·9, and Napanee 3 or 10·3 per cent.

Females are more subject to Phthisis than males in nearly every period of life. In the following table this is plainly seen, as well as the prevalence of the disease in the various periods of life, and also the great mortality between the ages of 20 and 30 years.

MORTALITY FROM CONSUMPTION.

Anæmia.—Under this heading are included all who died from Infant Debility, Atrophy, General Debility, and Degeneration. They were not so classed in the last Report; General Debility and Degeneration were, in many cases, included under Old Age. The deaths from Anæmia in 1882 numbered 1895, principally of children recorded as dying from Infantile Debility. 1,441, or 76 per cent., died under one year; and 202, or 10 per cent., died between one and five years of age; therefore, of the 1,895 deaths returned as dying from Anæmia 1,643, or 86 per cent., were children under five years. This was largely in excess of the number returned in 1881, and was chiefly caused by the large increase in the deaths from Infantile Debility returned from Ottawa. The three months, July, August, and September were the fatal periods to these infants, 199, 197, and 212, respectively having died in those months, making a total of 608, or 32 per cent. of all the deaths from that disease. The deaths in the other months did not vary to any great extent.

Dropsy and *Cancer* returned nearly the same number of cases—the first 393 and the second 397. Dropsy appears to be on the decrease, while Cancer seems to be advancing every year. These two diseases principally affect persons of middle and old age, 254 having died from Dropsy between the ages of 50 and 90—64 per cent. of all the deaths from this disease, while 266 died from Cancer during the same periods. Dropsy occupied the eighth place in the list of ten highest causes of death in 1879, since which time it does not appear on the list. Cancer in 1881 returned 313, in 1882; 397—an increase of 84, or 26 per cent. The mortality from these diseases was not very prominent in any one month of the year. More females than males died of Cancer, but in Dropsy the males and females were very nearly the same. No other disease in this class calls for any particular remarks.

CLASS III.—*Local Diseases*.—In this class are grouped many important diseases, in their various orders. In the first order (*Nervous diseases*), Apoplexy, and Convulsions are found very similar in their action. They caused the death of 803 persons—449 males and 354 females; about the same number as in 1881. More males than females died from these diseases. Meningitis and Encephalitis—both diseases of the brain—caused the death of 526 persons, 268 males and 258 females. The deaths from these two diseases appear to have been confined in a great measure to children under five years of age, as 260, or 50 per cent. were registered as dying of those diseases at that period of life. The months of May, June, and September returned a larger number of deaths from Meningitis than the other months; and so do February and April from Encephalitis. More males than females died from these two diseases.

In Order 2 of this class (*Diseases of the Circulatory System*) diseases of the heart are the most important. The deaths from them are increasing every year. 828 persons are recorded as having died from the various affections of this organ of the body in 1882—404 males and 424 females. The deaths from Valvular Disease of the Heart were most numerous in the months of March, October and December; they returned respectively 77, 71, and 74—altogether 222, or nearly 30 per cent of all deaths from this cause. September and February were the months most free from deaths of this kind; they numbered 55 and 54. Between 50 and 80 years of age there were 392 deaths from this affection of the heart, 52 per cent. of all; therefore it may be called a disease of old age, though 38 deaths were registered under five years of age. It is sixth in the ten highest causes of death.

Order 3.—*Diseases affecting the lungs, chest, and throat*, such as Pneumonia, Apoplexia pulmonalis, Bronchitis, and Laryngitis, are found to be the principal items of this order; together they returned 2,272 deaths—1,230 males and 1,042 females. March, April, and May, the three cold, wet, and windy months, proved very fatal to those affected with throat and lung complaints, no less than 893 persons having died of them in those months; while in the hot, dry months of July, August, and September only 289 deaths were recorded. 523 infants under one year, and 383 between one and five years died from these causes, while 596 died between the ages of 50 and 80. Therefore they are to a large extent diseases of childhood and old age; the least fatal period was between 5 and 20 years—only 186 deaths took place at that time of life.

Pneumonia, the principal lung disease, stands fourth on the list of ten highest causes of deaths. It has held the same position for many years.

Order 4.—(Diseases of the Digestive System).—Four of the principal diseases in this order are Dyspepsia, Enteritis, Gastritis, and Peritonitis, and are sometimes the results of inattention to proper dietary rules and conditions, therefore the number of deaths registered from these causes should act as a warning to those who neglect or infringe upon the demands of nature. There were 761 deaths, 412 males and 349 females registered in 1882 from these causes. The hot months of summer, returned the largest mortality, 225 having died in those months; October also returned as large a number—73. The deaths under one year were double those of any other period of age. The mortality was large between 20 and 30, being 79, and so also was it between 60 and 70, in which 76 died. The periods between 70 and 80, and between 10 and 15 appear to have been comparatively free from deaths of the digestive organs. Neither of these four diseases appear in the ten highest causes of death.

Order 5.—Diseases of the Urinary System.—Nephria and Nephritis, both affecting the kidneys, are the principal diseases in this order, they numbered 220, 141 males and 79 females, and were most prevalent in the fall and spring, they also attacked more old people than young. More males than females died of these diseases. Orders 6, 7, and 8 require no special comment.

CLASS IV.—Developmental Diseases of Children.—Order 1.—108 little ones lost their lives during the trying ordeal of dentition. There were 256 cases of still born, and 181 of premature birth, making a total of 437 who never really existed, or at least very temporarily.

Order 2 refers to *Diseases of Women*, and it is sad to find that 293 women died of diseases incidental to child bearing. The ages of these women were between 15 and 50 years.

Order 3.—Old Age.—General Debility and Degeneration, two causes of death heretofore entered under Old Age, are now, in accordance with the new classification, placed under Anæmia, consequently a less number of deaths were returned from Old Age, and it now stands third in the ten highest causes of death instead of retaining its usual place, second, a position it has held for ten years previous to 1882. Anæmia takes its place as second on the list. There were, however, 1,841 persons returned as dying from Old Age, 946 males, and 895 females. These deaths were of persons far advanced in life, who passed away apparently without any specific disease, and probably were not attended by a physician in their last illness, and therefore their friends registered them as dying of Old Age.

CLASS V.—Violent Deaths.—These were either caused by accident, negligence or wilfulness on the person's own part or that of others. The total number of these deaths was 869, 692 males, and 177 females. 74 were from suicide, 59 males and 15 females, which is to be regretted, but the number is comparatively small in proportion to other countries. As railways multiply throughout the Province so will accidents through them increase. The increase was very great in 1882. In 1881 only 55 persons were registered as having been killed by cars, in 1882, 102 persons were so returned—nearly double the number.

Respecting those diseases which have not been particularly noticed in these cursory remarks, it is hoped that all interested in observing the rise and fall of the various causes of death, will study the minute and lengthy details given of every disease in the classification found in the tables of this Report. They have been compiled with great care, and a very large amount of labour.

AVERAGE AGES AT DEATH.

See Tables 24 and 25.

The average age at death of all who died in 1882 was 29.1 years (of males 29.8 years, of females 28.3 years). This is an increase in the length of life in the Province of nearly one year over 1881. In the year 1880 it was 31.2 years.

The mortality of children, at and under one year of age, was not so great as in 1881, when 6,653 were reported as dying at those early periods of life, while in 1882 only 6,118 were so returned, a decrease of 535. This accounts, in a great measure, for the increase in the average length of life. The following counties exceeded the general average age of 29.1 years:—Halton averaged 35.8 years; Haldimand, 34.5 years; Lanark, 37.4 years; Leeds and Grenville, (united) 34.1 years; Lennox and Addington (united), 34.0 years; Northumberland and Durham (united), 35.2 years; but these counties returned a low death rate, some of them as low as 7 per 1,000; and further, none of them include large cities, where the deaths at and under one year of age are generally large, and which greatly influences the general length of life. In some counties on the contrary, where the average length of life was low, the death rate was large. Carleton, in which the average age was only 19.0 years, returned a death rate 23.6 per 1,000. Essex, with an average age of 23.1 years, had a death rate of 14.5. Wentworth, with an average age of 29.8 years, returned a death rate of 15.9, and the average age in the county of York was 23.9 years, with a death rate of 16.1 per 1,000.

In the cities and towns the length of life was less than the average of the whole Province, being only 24.1 years. In Ottawa the average was only 15.7 years, owing to very large mortality at and under one year of age, 694 deaths having occurred in those periods of life.

When those who died under one year are deducted from the whole number of deaths, the average length of life is largely increased. For the whole Province the average was raised from 29.1 to 36.9 years; in the cities and towns from 24.1 to 34.1 years. In some of the cities and towns the increase was much larger. In Ottawa, after deducting 575 deaths under one year, the length of life of the remainder was raised from 15.7 years to 28.6 years. Toronto, by the same means, increased from 21.3 years to 31.8 years, the number of deaths under one year being 530. London increased from 25.0 to 37.2 years, the deaths under one being 106, or nearly 34 per cent. The town of Milton had the largest increase, by this deduction; the average age rose from 29.8 years to 46.1 years, an increase of 16.3 years, although the deaths under one year were only 6, but these six deaths were 40 per cent. of all the deaths returned from this town. Other towns were similarly increased. Goderich from 35.0 to 46.3 years, Brampton from 32.6 to 42.8 years, Chatham from 24.3 to 34.2 years, Sarnia from 20.9 to 30.2 years, and Pembroke from 20.6 to 29.5 years. Sandwich reported no deaths under one year, therefore the average age remains the same, 17.8 years.

Total deaths over 60....	968	1612	790	989	342	202	20	5	14	123	5065

Every year a number of persons are reported to be 100 years, and over, at the time of their death. Twenty-six such cases were reported in 1882. Enquiries made respecting these centenarians have hitherto failed to establish satisfactorily the truth of these advanced ages. In the nationality of decedents over sixty years of age, in every period from that age to 100 years, the Irish largely predominated. They numbered 1,612 out of a total of 5,065, nearly 32 per cent. English and Canadians are nearly the same, 968 and 989 respectively. The Scotch followed, with 790, and those of American birth numbered 342. Out of 26 who were reported as being 100 years, and upwards, at the time of their death, 11 were born in Ireland.

REMARKS ON DEATHS BY OCCUPATIONS.

(See Table 28.)

The average age at death of those whose occupations were given was one year greater in 1882 than in 1881. The average for several years was as follows :—

For 1873 it was.....	52·8	years.
“ 1874 “	55·2	“
“ 1875 “	no	report.
“ 1876 “	55·7	years.
“ 1877 “	56·1	“
“ 1878 “	57·1	“
“ 1879 “	57·6	“
“ 1880 “	57·3	“
“ 1881 “	56	nearly.
“ 1882 “	57	years.

There were registered in 1882 the deaths of 5,289 persons, who at the time of their death were following some occupation. Three thousand and forty-nine, or more than one-half of them, lived to be over the average age, 57 years. Conspicuous amongst them were Pensioners, Gentlemen, Farmers, and Public Officials. They numbered 2,796, with an average age of 65·5 years ; an enviable class to belong to. They are those who generally do not have to contend with the worries and cares of business, or with the hard struggles and heavy toil of those who work for a living in cities and towns. Clergymen alone in this list of persons dying above the average age were brain workers. Merchants and professional men, as a class, die before arriving at the average age of life.

TEN OCCUPATIONS GIVING THE HIGHEST AVERAGE AGE AT DEATH.

(See Table 29.)

In this comparative list some changes have taken place since 1881, "gentlemen" held the highest place with an average age of 70 years in 1881. In 1882 millwrights took their place with an average age of 74.8 years, but only five of this occupation died, whereas the deaths of 170 gentlemen were recorded at an average age of 68.2 years; they are now fourth on the list. Masons are seventh with an average age of 64.4 years, they were third in 1881 with an average age of 66 years. Provincial Land Surveyors, who were fifth in 1881, have dropped out of the list altogether in 1882. Gardeners retain the same place, but with an increase of two years in their average age. Clergymen, Shoemakers and Tanners and Curriers, who held respectively in 1881, the seventh, ninth and tenth places in this list, do not appear in 1882; fewer of them died, and their average age was not as large as in 1881. Farmers have also retrograded to some extent, they formerly held the eighth place, but in 1882 they were last, their average age, however, was nearly two years longer.

TEN OCCUPATIONS GIVING THE LOWEST AVERAGE AGE AT DEATH.

The lowest average age of any calling in 1882 was that of Students, twenty-six years; in 1881 Telegraph Operators were the lowest. Students lose that appellation when they have finished their studies and entered their profession, therefore those who died while they were pursuing their studies died young. Milliners, Artists, Lumbermen and Editors do not appear on this list in 1882, their places have been taken by Students, Female Teachers and Domestic Servants. Printers were seventh on the list in 1881 with an average age of thirty-six years; in 1882 they were fourth, with only thirty-two years, a decrease of 4 years in their average ages. All these callings which exhibit so low an average length of life may be considered prejudicial to longevity. Over-study, it is well known, causes many deaths in early life, and that was probably one of the causes why Students appear in the list with so low an average age at their deaths. The length of the

lives of Female Teachers was shorter than that of Male Teachers. The hardships incidental to a life of teaching weigh more heavily on females than males, especially in cities and towns where they have to encounter more densely crowded rooms through a larger attendance of children, than their fellow Male Teachers, the younger ones being invariably placed under their charge and consequently their work is more wearing and exhausting. Their average age at the time of death was thirty-six, while that of Male Teachers was fifty-two years.

The occupation of a Seamstress is not thought to be conducive to good health, and consequently it is found that in every country their average length of life is low. In 1882 their average age was 32·7 years, in 1881 it was 40 years, a decrease of over seven years. This was probably caused by more being engaged in that work, as there were eleven more deaths in 1882 than in 1881.

TABLE 30.

Sailors	35	1663	47.5
Volunteers, Soldiers and Pensioners	39	2768	70.9
CLASS VII.—FEMALES AT WORK	95	3373	35.5
Domestic Servants	52	1901	36.6
Milliners and Dressmakers	16	589	36.8
Seamstresses	27	883	32.7

This classification of Deaths from Occupations excludes farmers' wives and housewives, which lowers the average age slightly. Including all, the average age is 57 years, without these decedents it is 56.7 years.

Cultivators of the soil were six less in number in 1882 than in 1881, but their average age has increased from 60 to 61.9 years. Mechanics and Labourers' ages were the same as in 1881. Merchants were slightly less. Professional Men's average age was nearly the same. "Other employments," and "Females at work," returned a lower average age, particularly the latter, whose ages have decreased from 38 to 35.5 years.

CLASS I. *Farmers and Gardeners*.—They both returned increased average age at death, which shews how conducive to long life these outdoor employments are, and yet it is observed that the desire for leaving them for city employment is increasing.

CLASS II. *Mechanics*.—This list embraces 34 different trades. The most numerous are Carpenters, 173 having died at an average age of 54 years. 94 Shoemakers died, at 55.8 years. The four trades, Carpenters, Shoemakers, Blacksmiths, and Tailors together returned 389 deaths or 43 per cent. of all the mechanics who died in 1882; their average age was 55.3 years, a very fair length of life for those trades. Tailors were the longest lived, their average age in 1882, was 63 years, though in 1881 it was only 54 years.

The following Mechanics returned a low average age: Tobacconists, 30 years; Printers, 32 years; Barbers, 37 years; Moulders, 36 years; and Sawyers, 36.7 years.

16 out of the 34 Mechanical trades returned more than the average age of the whole class, 52.0 years, and 18 a less average age.

Masons and Weavers are long lived, they generally reach the highest age of any in this class. In 1882 their average age was nearly 70 years. Millwrights returned a higher age, 74 years, but it is exceptional, they are few in number, and their ages vary every year.

CLASS III. *Labourers* of which there were only three kinds viz.: Labourers, Pedlars, and Teamsters; they numbered 769 with an average of 52.7 years, somewhat larger than Mechanics. Teamsters are the shortest lived in this class, their average age was only 44 years.

CLASS IV. *Merchants, Financiers, Agents, &c.*—This class returned a low average age, 45.9 years, the lowest of any class, except females. Book-keepers, Salesmen, and Clerks, are included in this class, they had the lowest average age in this class: 35.9 years. The confinement attendant on these occupations no doubt tends to shorten life. The average age of manufacturers was over fifty-four years of age. They are not so much confined indoors as Book-keepers and Clerks, their work is not so much of a sedentary nature and it calls for considerable muscular action, which tends to lengthen life. The average age of Telegraph operators is always low. In 1881 it was 25 years, in 1882 28 years, an increase of three years. Those who follow this occupation seldom continue at it many years.

CLASS V. *Professional Men*.—Their average was 58.5 years. With the exception of the cultivators of the soil, they are the only class that return an average age equal to, or greater than the general average, 56.7 years. The three professions (we might add a fourth, Teachers) Law, Divinity, and Medicine, are included in this class; they numbered together 100, exactly the same as in 1881, but their average age is higher—55 years. In 1881 it was 53.9. Clergymen seem to outlive the other professional gentlemen, their average age was 60.5 years.

CLASS VI. *Other employments*.—The persons included in this class are, with the exception of pensioners, those who are liable to violent deaths, and therefore their average age is comparatively low.

CLASS VII. *Females at work*.—This class returned the lowest average age of any class, 35.5 years. Two of the occupations in the class, Milliners and Seamstresses, always return a low average age at death; but why domestic servants should do so, is not easily explained.

DEATHS BY OCCUPATIONS.—CAUSES OF DEATH.

This List contains the same diseases, with one exception, as in 1881. Enteritis took the place of Lung Disease. In 1881 a large number of persons were returned as dying from affection of the Lungs, and as no distinct form was given, they were included under the simple heading "Lung disease." In 1882 in consequence of the introduction of the new classification of diseases, they were registered under their appropriate headings, such as Pneumonia, Apoplexia Pulmonalis, etc, and this explains why the number of deaths from Pneumonia was so much larger in 1882, as a large number of deaths heretofore classified under Lung Disease being now included under Pneumonia. The total number of deaths in the whole Province in 1882 was considerably less than in 1881, a corresponding decrease is therefore observed in some of the diseases on this List. Heart disease and Apoplexy have fallen to 4th and 5th position instead of 3rd and 4th, which they formerly held. The decrease in the number of deaths from Apoplexy was caused by it being separated from Paralysis, with which it was formerly joined. Pneumonia and violent deaths took the place of those two diseases. All kinds of Fevers were enumerated under one head, "Fevers," in 1881; in 1882 they were separated into their various divisions, and only one kind, Typhoid Fever, takes a place on the List. Cancer has increased and it now occupies the 8th place instead of the last. Under the heading "Cancer" are included all the different varieties of this disease. Dropsy remains in the same position 9th on the list. It is pleasant to record that "Old Age" was the principal cause of death of these workers; but it is far from gratifying to find so many dying from Phthisis. Farmers, by far, outnumbered all other occupations and they also returned more deaths from consumption, 286 of them died from that disease, nearly the same number as in 1881; but it was only 11.4 per cent. of their deaths from all causes; while Seamstresses and Female Teachers returned 59.2 and 44.4 per cent. respectively. Bookkeepers and Clerks returned 30 per cent. and Blacksmiths, Carpenters, and Shoemakers over 20 per cent.; Merchants and Labourers had nearly the same, 15 per cent. Gentlemen returned the lowest death rate from this disease 8.8 per cent.; these persons, however, generally die at an advanced age; their average age at death in 1882 was 68.2 years; but the victims of Consumption generally die in early life. The ten occupations in this list returned in all, 560 deaths from this cause, which was 13.8 per cent. of the deaths from all causes.

I have the honour to be,

Sir,

Your obedient servant,

H. S. CREWE,

Inspector.
